ADHESIVES GUIDE 2024

ADHESIVES GUIDE 2024

The 2024 Flooring Adhesives Guide is designed to simplify the task of finding the right product for the job. Selecting the correct flooring adhesive is crucial for ensuring the longevity, durability, appearance, and safety of the flooring installation, as well as adhering to warranty requirements and building regulations.

Choosing the right flooring adhesive is fundamental in achieving a quality flooring installation for several reasons:

1. Compatibility: Different types of flooring materials require specific types of adhesives to ensure proper bonding. For example, the adhesive that works well with vinyl tiles may not be suitable for wood flooring. Using the wrong adhesive can lead to poor adhesion, causing the flooring to lift, shift, or even disintegrate over time.

2. Durability: The right adhesive will enhance the durability of the flooring by ensuring that it remains firmly attached to the substrate under various conditions. This includes withstanding foot traffic, moisture, temperature changes, and other environmental factors that could otherwise cause the flooring to deteriorate prematurely.

3. Moisture Resistance: Certain areas, like bathrooms and kitchens, are prone to high moisture levels. Specific adhesives are designed to be moisture-resistant and are necessary in these environments to prevent water damage to both the flooring and the adhesive bond, which can lead to mould growth and flooring failure.

4. Ease of Installation: Using the appropriate adhesive can make the installation process smoother and more efficient. Some adhesives offer a longer working time, allowing for adjustments during installation, while others set quickly for rapid installations. Choosing the right one can significantly impact the ease and speed of the installation process.

5. Health and Safety: Some adhesives contain volatile organic compounds (VOCs) that can have health implications for the installer and occupants of the building. Low-VOC or VOC-free adhesives can improve indoor air quality and are essential in environments where health concerns are a priority.

6. Aesthetics: The right adhesive ensures a smooth and uniform finish by preventing issues like unevenness, bubbling, or peeling, which can detract from the appearance of the flooring. This is particularly important for flooring options that are chosen for their aesthetic appeal.

7. Warranty and Compliance: Many flooring manufacturers specify the type of adhesive to be used with their products for the warranty to be valid. Using an incorrect adhesive can void the warranty and leave the installer or homeowner without recourse if problems arise. Compliance with building codes and regulations may also require the use of specific types of adhesives.

CAPITOL CARPET ADHESIVE 15LT CA150-15

A low VOC water-based carpet adhesive developed for bonding a wide range of carpets and underlays. CA-150 is suitable for bonding both jute and polypropylene backed carpets in direct stick and double bond type installations. The adhesive has prolonged re-bond time and has low VOC emission levels that conforms to the Green Star building requirements.

SIKA 200 CARPET ADHESIVE 15LT

SikaBond®-200 Carpet Adhesive is a low VOC, waterbased, premium carpet adhesive developed for bonding a wide range of carpets and underlays

- High Bond Strength
- Strong Tack Build
- Low Odour
- Low VOC
- Engineered for Australian conditions

CAPITOL PRESSURE SENSITIVE ADHESIVE 15LT PS150-15

A solvent free pressure sensitive adhesive formulated for installing PVC backed, fibre backed, cushion back carpet tiles and reinforced vinyl composition tiles. It is also highly recommended for installing laminated slab underlays used in Double-Bond carpet installation. Capitol Pressure Sensitive Adhesive can be applied to concrete substrates with moisture contents up to 85% relative humidity tested with the In-Situ probe method.

SIKA 201 PRESSURE SENSITIVE ADHESIVE 15LT

SikaBond® 201 Pressure Sensitive Adhesive provides low VOC emissions and is anti-microbial, it has been developed for the installation of vinyl composition tiles. It is also suitable for the installation of Carpet Tiles and slab underlays used in the double bond carpet installation.

- Anti-microbial
- Low VOC
- Easy to spread
- Plasticiser resistance to PVC
- Spreads white, dries clear

CAPITOL VINYL ADHESIVE 15LT VI150-15

A water-based multipurpose adhesive suitable for installation of dimensional stable PVC flooring - including LVT, LVP, Linoleum and sanded back sheet rubber flooring up to 4mm thick, it is also suitable for bonding textile floor coverings with all common backings. This high-performance adhesive is suitable in wet mode for LVP or semi-wet mode for sheet vinyl floor coverings.

SIKA 202 HS VINYL ADHESIVE 15LT

SikaBond® 202 Hard Set Vinyl Adhesive is a full cure hard set adhesive with Low VOC emission. It is perfect for PVC plank Luxury vinyl tiles / plank PVC Tile Sheet vinyl floor coverings

- Low VOC
- No residual tack once dried
- High bond strength
- Very high cohesive strength
- Wet phase bonding LVP

CAPITOL HS VINYL ADHESIVE 15LT CHSV-15

A water-based hard-set adhesive suitable for installation of dimensional stable PVC flooring - including LVT, LVP, Linoleum and sanded back sheet rubber flooring up to 4mm thick, it is also suitable for bonding textile floor coverings with all common backings. This high-performance adhesive has a good all-round balance between open time and work time.

SIKA 203 UNIVERSAL VINYL ADHESIVE 15LT

SikaBond® 203 Universal Vinyl Adhesive is a water based, low VOC, high performance, multi purpose adhesive designed for various PVC and common backed textile floor coverings.

- Multi flooring types
- Low odour
- Low VOC
- Strong tack build
- Easy to trowel
- Final hard set cure

PERFORMANCE. QUALITY. PRIDE.

Forbo Flooring Systems Australia

611 ULTIMATE LINO PLUS

Linoleum Adhesive - A Very low VOC emission linoleum adhesive. Recognised for having the best initial grab in the market with great working time for the installation of linoleum in sheet and tiles, as well as linoleum aquajet designs, borders and cork underlay. It is resilient against roller and caster chairs ensuring long-lasting performance. This was previously the 614 Eurostar Lino Plus.

FORBO FPS1

Pressure Sensitive Adhesive - A water-based, pressure-sensitive adhesive with low VOC emissions, anti-microbial properties and plasticizer resistance. Designed for Forbo Tessera carpet tiles and planks, Coral entrance flooring along with Flotex tiles and planks for domestic and commercial applications - Australian made.

F41 LINOLEUM ADHESIVE

High-performing polymer blend and low VOC adhesive suitable for linoleum sheet, tile and plank, polyolefin acoustic foam-backed linoleum and corkment underlay, provides a strong and permanent bond for both domestic and commercial applications - Proudly Australian made.

FORBO F34

Permanent Bond Modular Vinyl Tile & Plank Adhesive - Australian made high-performing polymer blend adhesive for modular vinyl tiles and planks, offering a permanent bond. This adhesive is not only low in VOC emissions but also offers excellent resistance to plasticizers and is suitable for use on absorbent subfloor.

615 EUROSTAR LINO PLUS EL

Conductive Linoleum Adhesive - A special superior acrylic dispersion adhesive for conductive linoleum with very low emissions and high initial grab, featuring an electrical resistance of <3.105 Ohm in accordance with EN 13415. Recommended for use as part of a full conductive system with copper tape.

FORBO F54

Vinyl Sheet & Flocked Flooring Adhesive - This superior dispersion polymer blend adhesive has low VOC and is designed for the installation of commercial and domestic vinyl and Flotex sheet flooring. It is suitable for both compact and cushioned backed sheet flooring, providing a strong and permanent bond - Australian made.

FLOORING SYSTEMS

641 EUROSTAR SPECIAL EL

Conductive Vinyl Adhesive - A special and superior acrylic dispersion adhesive for conductive vinyl sheets and tiles with very low emissions and high initial adhesion strength, featuring an electrical resistance of < 3.105 Ohms in accordance with EN 13415. Recommended for use as part of a full conductive system with copper tape.

creating better environments

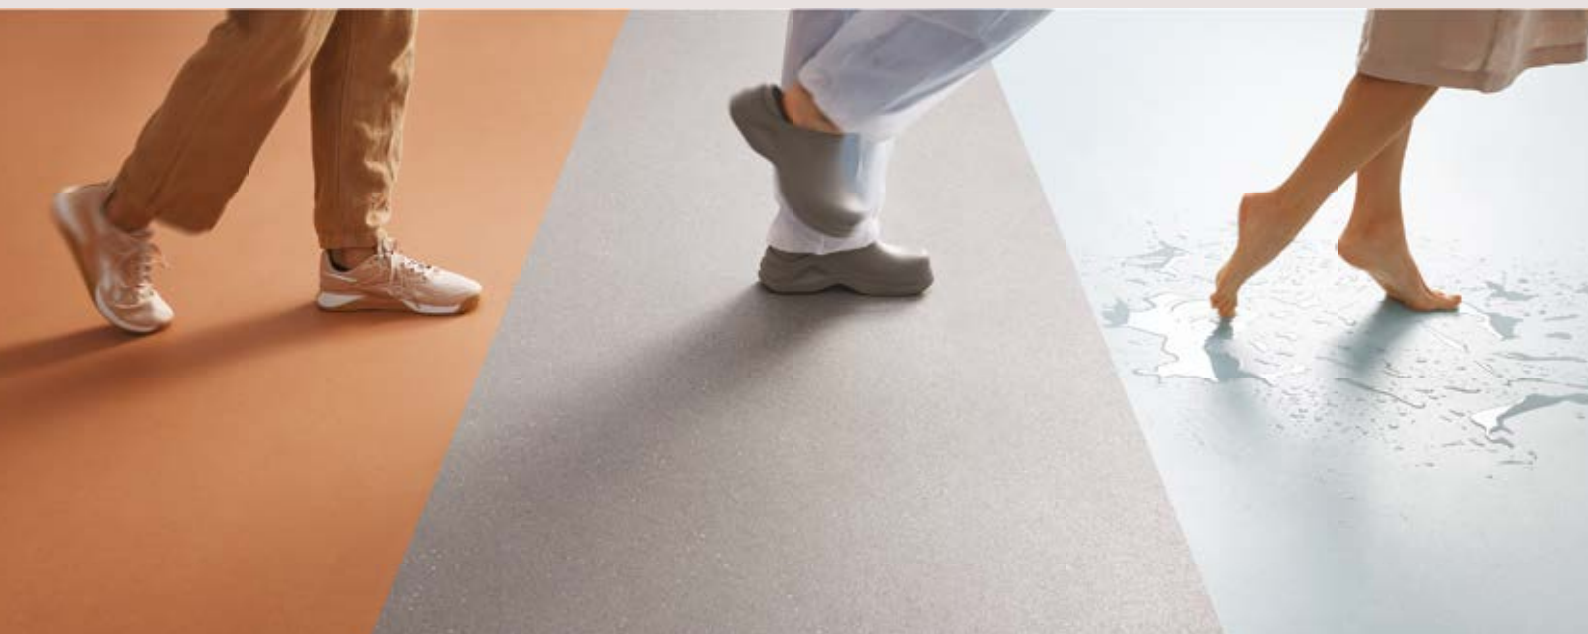

step[®] safety vinyl surestep[®] | safestep[®]

YOUR STEPS **SURE AND SAFE**

Step safety flooring delivers excellence in Safety, Design and Confidence, meeting slip standards in Australia and New Zealand across diverse applications.

Coordinated designs linking **R10**, **R11**, **R12** and **barefoot** categories. The collection ensures sustainable slip resistance and easy floor care.

Step contributes to Green Star projects as "Best Practice" with recognised initiatives from the Vinyl Council of Australia, GreenTag GreenRate Level A and a third-party verified EPD. Explore the new collection at www.forbo-flooring.com.au/step.

Roberts

R100 CARPET ADHESIVE

A water-based carpet adhesive providing a strong tacky film of adhesive that is suitable for bonding carpets both Double Bond and Direct Stick installations. The adhesive offers a quick grab and has sufficient working time for smaller and larger installations.

R656 PRESSURE SENSITIVE ADHESIVE

A solvent free pressure sensitive adhesive formulated for installing PVC backed, fibre backed, cushion back carpet tiles and reinforced VCT. For installing laminated slab underlays used in Double-Bond carpet installation. R656 can be applied to concrete substrates with moisture contents up to 95% RH (moisture reducing) tested with the In- Situ Probe method and concrete substrates with pH readings of up to 12.0.

R200 UNIVERSAL VINYL ADHESIVE

A solvent free, low odour, low VOC water based acrylic emulsion with excellent plasticiser resistance and non staining properties. It is protected against bio-degradation, withstands normal wet cleaning practices and is suitable for use over underfloor heating installations.

R444 PRESSURE SENSITIVE ADHESIVE

Roberts 444 Pressure Sensitive Adhesive is a solvent free pressure sensitive adhesive formulated for installing PVC backed and modified composite backed Carpet Tiles. Roberts 444 Pressure Sensitive Adhesive can be applied to concrete substrates with moisture contents up to 95% relative humidity tested with by way of In- Situ Probe method and concrete substrates with pH readings of up to 12.0.

R2000 UNIVERSAL FLOORING ADHESIVE

Roberts 2000 is an acrylic co- polymer hard set adhesive with strong initial tack qualities and bond for a range PVC vinyl and textile floorcoverings. It has excellent plasticiser resistance and non staining properties. It is for interior use only and is protected against bio-degradation, withstands normal wet cleaning practices and is suitable for use over underfloor heating installations.

R280 HT VINYL ADHESIVE

A high temperature hard set adhesive with a short open time & excellent adhesion. It is fibre – reinforced and highly shear – resistant with excellent plasticiser migration resistance, non staining properties and provides resistance to temperature variations. It is protected against bio-degradation, withstands normal wet cleaning practices and is suitable for use over underfloor heating installations.

R640 PRESSURE SENSITIVE ADHESIVE

Solvent free pressure sensitive adhesive formulated for installing cushion back carpet tiles and reinforced vinyl composition tiles. It can also be applied for the installing double bond carpet underlays and other various Carpet tiles. R640 can be applied to concrete substrates with moisture contents up to 95% RH and concrete substrates with pH readings of up to 12.0.

R420 MEDI-SEAL

A solvent free, low odour, antimicrobial, low VOC water-based water based modified acrylic compound. It has a blue milky appearance and is used for sealing concrete and other cementitious substrates. This cures to form a clear and impervious film. Displays excellent long term resistance to urine, water, blood and most other common chemicals. Ideal for sealing concrete floors in hospital, health care and age care facilities.

for the environment”*

RLA Polymers

RLA CARPET ADHESIVE

RLA Carpet Adhesive is solvent free, low odour, water-based carpet adhesive providing a strong tacky film of adhesive that is suitable for bonding carpets both Double Bond and Direct Stick installations. The adhesive offers a quick grab and has sufficient working time for smaller and larger installations.

RLA CARPET TILE PRESSURE SENSITIVE ADHESIVE

RLA Carpet Tile Pressure Sensitive Adhesive is a solvent free pressure sensitive adhesive formulated for installing PVC backed and modified composite backed carpet tiles. RLA Carpet Tile Pressure Sensitive Adhesive can be applied to concrete substrates with moisture contents up to 85% relative humidity tested with the In- Situ Probe method.

RLA VINYL PLANK ADHESIVE

RLA Vinyl Plank adhesive is a solvent free, low odour, low VOC, hard set adhesive suitable for bonding most PVC commercial and domestic vinyl sheeting products, vinyl composite tiles, PVC vinyl tiles and vinyl plank flooring. It has high initial grab and is ideal for bonding both supported and unsupported PVC vinyl.

RLA 999 UNIVERSAL PRESSURE SENSITIVE ADHESIVE

RLA 999 Pressure Universal Sensitive Adhesive is a solvent free, low odour, low VOC, pressure sensitive adhesive formulated for installing PVC backed, fibre backed, cushion back carpet tiles and reinforced vinyl composition tiles. It is also highly recommended for installing laminated slab underlays used in Double-Bond carpet installation. RLA 999 can be applied to concrete substrates with moisture contents up to 85% relative humidity tested with the In- Situ Probe method.

RLA 265 UNIVERSAL VINYL ADHESIVE

RLA 265 Universal Vinyl Adhesive is a water based acrylic emulsion hard set adhesive suitable for bonding most PVC commercial and domestic vinyl sheeting products, vinyl composite tiles, PVC vinyl tiles and vinyl plank flooring. It has high initial grab and is ideal for bonding both supported and unsupported PVC vinyl. It is protected against bio-degradation, withstands normal wet cleaning practices and is suitable for use over underfloor heating installations.

RL1000 SMP HYBRID RESILIENT FLOORING ADHESIVE

RL1000 Resilient Flooring Adhesive is a single-part, VOC compliant isocyanate free water resistant resilient flooring adhesive. It is recommended for use in wet areas for bonding approved vinyl, rubber and linoleum floorcoverings to most common internal and external subfloors. It is suitable for areas such as bay windows, glass shop fronts, and other areas that are exposed to sun light.

RLA UNIVERSAL RESILIENT ADHESIVE

RLA Universal Resilient Adhesive is a solvent free, low odour, low VOC, acrylic co- polymer hard set adhesive with strong initial tack qualities and bond for a range Commercial and Domestic PVC Sheet Vinyl, Wall Vinyl, PVC Vinyl Plank and Linoleum. It has excellent plasticiser resistance and non-staining properties. It is protected against bio-degradation, withstands normal wet cleaning practices and is suitable for use over underfloor heating installations.

MS TIMBER FLOORING ADHESIVE

Permanently flexible solvent and isocyanate free MS timber flooring adhesive. For bonding approved acoustic underlays to most common subfloors. Recommended for bonding solid timber flooring, Parquet flooring and engineered timber flooring to approved acoustic underlay as well as directly to most common subfloors.
